
Fact Finding Fun

PART A

The table of contents, glossary, and index can save you time by helping you find information in a book quickly. Match each book part with its description below.

- | | |
|---------------------------|--|
| ____ 1. Table of contents | A. list of words and definitions; like a mini-dictionary |
| ____ 2. Glossary | B. list of units, chapters, and page numbers |
| ____ 3. Index | C. list of topics and page numbers |

PART B - *You will use your Science textbook to answer the questions below.*

Read each question and decide which part of the book you would use to find the answer. Circle T if the question could best be answered by using the Table of contents, circle G for Glossary, or I for Index. Then use that part of the book to answer the question.

T G I 1) Name two arachnids other than spiders. _____

T G I 2) The bicep muscle is in what part of the body? _____

T G I 3) What is caffeine? _____

T G I 4) What is Topic 1 in Chapter 5? _____

T G I 5) What does Unit 5 cover? _____

T G I 6) Name two narcotics. _____

T G I 7) On what page does Chapter 13 begin? _____

T G I 8) What is a water table? _____

T G I 9) What is a sponge? _____

T G I 10) A tadpole is an amphibian. Why can't a tadpole live on land? _____

BONUS: Write one or more questions of your own. Write the correct answer and tell whether it should be looked up in the table of contents, glossary, or index.
