

## HOW TO: Create Web Photo Albums in Dreamweaver

Step 1: Create folder on computer desktop and save all photos for album in that folder

Step 2: In your web site folder, create a new folder and name it Album

Step 3: In Dreamweaver, go to Commands menu and choose Create Web Photo Album

Step 4: In dialog box, name photo album then choose photo folder on desktop as source and Album folder in web site folder as destination

Step 5: Complete dialog box as follows > uncheck "show filenames" > set thumbnail size at 72x72 (36x36 if lots of photos) > set thumbnail format as "smaller file" > set photo format as "better quality" > scale 70% to 85% > check "create navigation page"

**Create Web Photo Album**

Photo album title: MUSEUM FIELD TRIP

Subheading info:
